

INTRODUCTION TO DATABASES AND SQL

Tamás Budavári / The Johns Hopkins University

Databases

Tamás Budavári

- Store your bytes
 - ▣ And return them
- Efficient filtering
 - ▣ Thousands of man-years
 - ▣ Optimally pick from many strategies

Databases

Tamás Budavári

- SQL basics
 - ▣ filtering, aggregation, joins
- SQL programming
 - ▣ variables, functions, procedures
 - ▣ data management, transactions
- Tools

SQL: Structured Query Language

Tamás Budavári

- Standard declarative language
- Filter the data
- Powerful analysis tool
- Possible to extend

SDSS

Sloan Digital Sky Survey / SkyServer

[Home](#)[Tools](#)[Schema](#)[Projects](#)[Astronomy](#)[SDSS](#)[Contact Us](#)[Download](#)[Site Search](#)[Help](#)

Due to system maintenance this site will be unavailable Thursday March 17th from 7:00AM central until 7:30AM central. We apologize for the inconvenience.

Welcome to the **DR7** site!!!

This website presents data from the Sloan Digital Sky Survey, a project to make a map of a large part of the universe. We would like to show you the beauty of the universe, and share with you our excitement as we build the largest map in the history of the world.

News

The site hosts data from **Data Release 7 (DR7)**.
What's new in DR7, what's new on this site, and known problems.

Tamas Budavari 's MyDB

20,992 kB of 100,000 kB used

From this page you can get various information about the contents of both your MyDB and shared tables within your groups. Click the left table links to get information about a specific table, such as rows, columns or size. From the table pages you can also perform various table-specific tasks, such as:

- Download a table
- Mangage your group tables
- Rename a table
- Drop a table

Sizes are approximations only.

Row counts are approximations only. For exact value run a count.

There's always some overhead, even empty MyDB's take up space.

Group tables do not count towards your MyDB size limit.

Transactions

ACID Properties

The Elevator Problem

Tamás Budavári

- People on multiple levels
 - ▣ Press the button...

Mutual Exclusion

- Multiple processes or threads
 - ▣ Access shared resources in critical sections
 - E.g., call the elevator when it's time to go
- Locking
 - ▣ Elevators, etc...

Dining Philosophers

Tamás Budavári

- Five silent philosophers sit at the table
 - ▣ Alternate between eating and thinking
 - ▣ Need both forks left & right to eat
 - Must be picked up one by one!
 - ▣ Infinite food in front of them
- How can they all think & eat forever?

Database Transactions

Tamás Budavári

- Every time somebody swipes a card
- Commands in SQL
 - ▣ BEGIN TRANSACTION [name]
 - ▣ COMMIT TRANSACTION [...]
 - ▣ ROLLBACK TRANSACTION [...]
- Nested transactions

ACID Properties

- Requirements
 - ▣ Atomicity
 - ▣ Consistency
 - ▣ Isolation
 - ▣ Durability

Defined by Jim Gray

Atomicity

- All parts of a transaction succeed
- Or rollback to previous state

Defined by Jim Gray

Consistency

- Data always meets validation rules
 - ▣ Any type of constraints

Defined by Jim Gray

Isolation

- No inference across transactions
 - ▣ Even if concurrent

Defined by Jim Gray

Durability

- Committed transaction will remain so
 - ▣ Even in the event of power failure, error, ...
 - Caching in harddrives, etc...

Defined by Jim Gray

SQL by Examples

Database Systems

Tamás Budavári

- SQLite
 - ▣ To start with the smallest
 - ▣ Command line executable
 - Single library for coding
 - ▣ Also a pure C# implementation

- Hands-on...

Database Systems

Tamás Budavári

- ❑ MySQL – open source
- ❑ PostgreSQL and Greenplum
- ❑ Microsoft SQL Server (Express Edition)
 - ▣ Same as the one under our LabDB
- ❑ IBM DB2 (Express-C)
- ❑ Oracle Database (XE-Express Edition)

Database Systems

Tamás Budavári

- MonetDB
 - ▣ Column store
- SciDB
 - ▣ Array database under development

Server – Client

Tamás Budavári

- Multiple clients
- Different client apps
 - ▣ Graphical UI
 - ▣ Command line
 - ▣ Your custom analysis

3.3 Highlights:

- Enhancements
 - Graph plugin now features a graphical query builder
 - New plugin "WIKI table configurations": save query results in WIKI formats
 - Syntax highlighting for database object source code
 - New plugin for Greenplum database
 - Improved memory management for large result sets
 - SQL Scripts Plugin now allows storing results of queries directly to file
 - DB-Diff-Plugin has side-by-side comparison and now supports external diff tools
 - Updated Chinese/French translations
 - Errors are now displayed in a temporary result tab for better visibility
 - Many other improvements were made for performance and ease-of-use
- A number of bug fixes

Programmatic Interface

Tamás Budavári

- Send SQL commands
- Read out the results
- Standard ODBC
 - ▣ Open Database Connectivity
 - ▣ C interface
- JDBC for Java

Research Them!

Tamás Budavári

- Which one?
- Why?
- Things to consider
 - ▣ How much data? Scale to my problem?
 - ▣ Extensibility for scientific analysis?
 - ▣ Hardware requirements? What OS?
